COPE Health Solutions Analytics for Risk Contracting Receives KLAS Research Benchmark Recognition in Healthcare Technologies and Services

Los Angeles, CA - April 30, 2024 – COPE Health Solutions' (CHS) Analytics for Risk Contracting (ARC) platform receives KLAS Research recognition for providing analytics and visualizations of population health data. The ARC Platform and our CHS clinical, operations and finance experts, partner with our clients to configure and implement tailored solutions that de-risk the transition to advanced value-based care and power quality, revenue and market share growth.

With the rapid rise in value-based care contracts and emphasis on both member and population level quality and cost impact, healthcare provider organizations are seeking insights into specific populations and metrics to manage outcomes and coordinate care.

The ARC Platform and our team of experts rapidly assess an organization's financial risk, as well as quality, cost and clinical continuity levers based on the organization's value-based care contracts. Financial projections, customized management reports, detailed analytics and expert insights empower leaders to inform decisions on clinical, operational and financial initiatives required to succeed in the contracts, as well as recommended term sheets for contract renegotiation or new agreements. The ARC Platform ingests claims & eligibility data, as well as EMR, ADT feed, care management and other data through integration with EMRs, HIEs and Care Management platforms. This enables ARC to create actionable opportunities in quality, clinical documentation, total cost of care, clinical continuity and membership retention & growth that are critical in driving success in value-based care agreements.

This comprehensive approach is useful for organizations at all levels of risk in their value-based arrangements, from those just getting started and considering a program like Making Care Primary or MSSP Flex ACO, those in or considering upside agreements with payers and CMS, and those who are already in downside or global risk arrangements and are seeking to grow and optimize performance. Beyond delivering analytics and insights, our team of experts deeply collaborates and supports organizations to configure proposed initiatives for effective implementation and scaling across the organization.

"Our firm has been accelerating success for payers and providers in the value-based care space across Medicaid, Medicare and Commercial lines of business for over 20 years and our team of experts built ARC collaboratively with our clients to include both provider and payer specific perspectives. We are known for our long-term win-win client relationships and ability to bring providers and plans together to win in the market," says Allen Miller, Founder and CEO of COPE Health Solutions.
