APG Conference **2024**

Ask us for a live demo on..

Provider Performance

Standardizes provider performance measurement in a scorecard across all lines of businesses.

Quickly visualize practice and provider relative performance to each other.

Panel List

View member panel attributed to a PCP with quality gap, CDQI, and cost data.

Identify and prioritize patients to engage to achieve quality payment and reduce total cost of care.

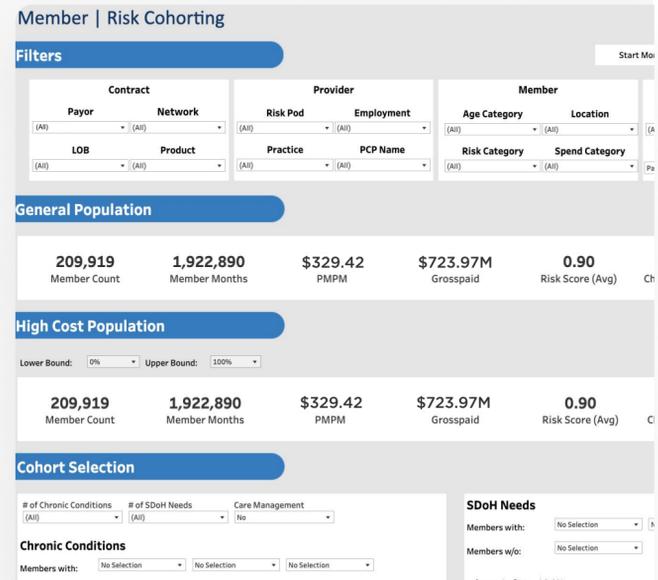

Member 360

Simplify and engage your member better with a comprehensive member view including longitudinal clinical timeline, open quality gaps, CDQI opportunity, claims data, and actionable member insights.

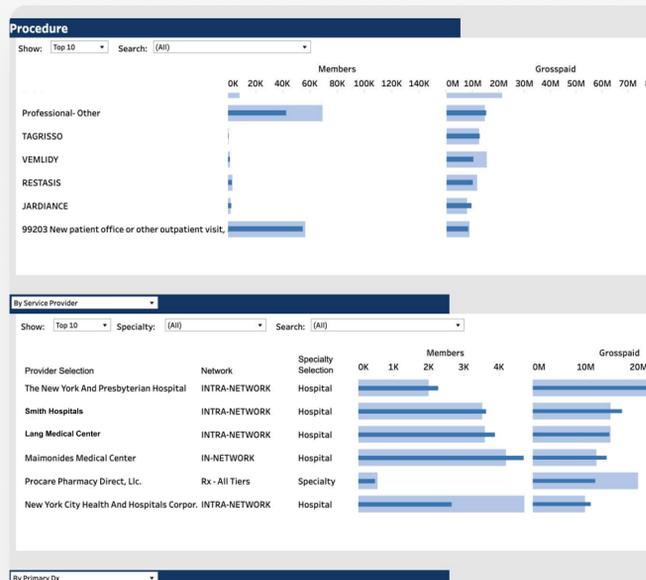

Risk Stratification

Risk stratify your member population by SDOH/ HRSN needs, chronic conditions, comorbidities, and other utilization measures.

Use ARC and use your custom stratification logic to place members into programs such as complex care, rising risks, and care management.

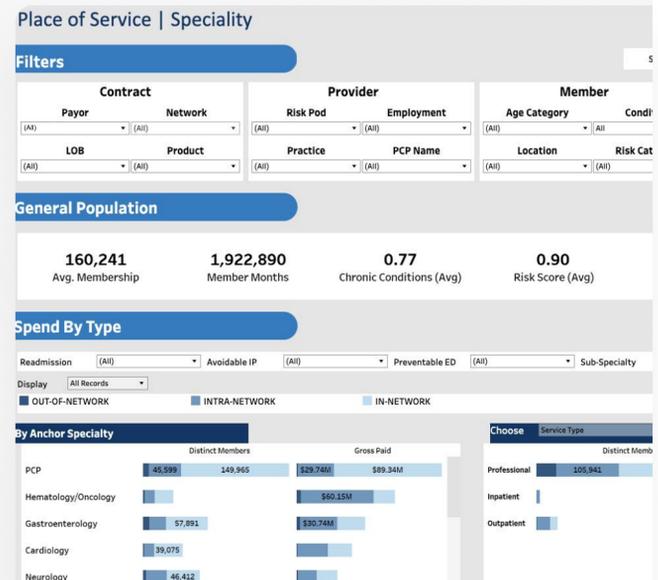

Cost & Utilization

Understand and identify highest impact drivers of change across multiple lines of business and service sites by exploring service category and procedure member utilization, gross paid, and unit cost.

Clinical Continuity

Understand and evaluate specialty physician practice patterns and performance. Compare physician efficiency, perform network optimization, and refine referral guidance.

Learn more about ARC

A population health management & analytics platform to support your specific provider and health system needs.
