

## HealthAxis and COPE Health Solutions Announce Strategic Partnership to Drive Value-Based Care and Operational Efficiency Across Health Plans and Providers

**New York, NY – October 3, 2024** — [HealthAxis](#), a leader in healthcare administration technology and business process operations, and [COPE Health Solutions](#) (CHS), a national expert in value-based care and population health management, are pleased to announce a strategic partnership aimed at delivering comprehensive, end-to-end solutions for health plans and for providers in value-based payment arrangements, including employee health plans. This collaboration brings together HealthAxis and COPE Health Solutions scalable CAPS and ARC platforms and business process operations with CHS' expertise in, value-based payment models, medical management, and analytics to drive operational efficiency and clinical excellence across the healthcare industry.

The partnership will be focused on supporting payers and risk-bearing providers—to streamline operations, reduce costs, and optimize clinical and quality performance.

"Our partnership with COPE Health Solutions underscores our shared vision of empowering healthcare organizations to thrive in a rapidly evolving industry," said Scott Martin, CEO of HealthAxis. "By combining HealthAxis' healthcare administration services with COPE Health Solutions' population health management technology solutions and value-based payment expertise, we are uniquely positioned to deliver comprehensive, high-impact solutions that address both operational efficiency and clinical excellence."

"Collaborating with HealthAxis enables us to bring a truly comprehensive and high-quality solution set to our clients nationally who are regional health plans, providers sponsored health plans, self-insured employers, delegated IPAs and other providers in advanced risk arrangements, said Allen Miller, Principal & Chief Executive Officer, COPE Health Solutions. "Meeting clients where they are, we can provide a full TPA or MSO solution enabled by our co-source model or more targeted solutions in areas such as medical management, care management, network build and management, analytics and others."
