

COPE Health Solutions (CHS) Medicare ACO Support

“We do not believe in a one-size fits all approach.”

CHS meets ACOs where they are. We bring a flexible partnership model that begins with empowering your team for success, and can scale to a full co-management model if needed.

Differentiators

Ensuring Shared Savings for You

We bring the capabilities you need to maximize your shared savings potential, reduce the administrative burden of running an ACO, while letting you keep 100% of your shared savings.

A Reliable Partner, NOT an Aggregator

CHS is a VBC analytics and consulting firm with cross-payer experience, focused on helping you succeed as an ACO and build strong VBC capabilities across all business lines.

Empowering Your Team, Not Mandating

CHS provides strategic guidance and program management support from our ACO subject matter experts to improve performance and manage ACO operations.

Adaptive to Your Needs

CHS does not impose canned clinical interventions or make demands of busy providers. We support with insights, analytics, subject matter expertise and seek to make providers self-sufficient over time.

COPE Health Solutions' Analytics for Risk Contracting (ARC) comprehensive value-based care platform is the backbone of our ACO support. ARC provides data-driven insights on performance improvement opportunities and configures high value integrated workflows with your existing tools and processes.

The ARC platform received KLAS Research recognition for providing analytics and visualizations of population health data.

We offer **Flexible Partnership Models** that include just ARC or:

- ARC with ACO SME Program Management support
- ARC with SME and Downside Risk Protection
- ARC with SME, Downside Risk, and Capitated Payment Distribution
- ARC with SME, Downside Risk, Capitated Payment Distribution, and Care Management

CHS Delivers the Capabilities Your ACO Needs to Be Successful

We want to help you launch and/or run your ACO and be the leader of your own VBC journey. We do not believe in the benchmark-hunting aggregator model which leaves providers vulnerable to impetuous decision made by third-party organizations.

- Program Management & Model Expertise
- Risk Adjustment
- Risk Stratification
- Clinical Insights
- VBC Analytics
- Downside Risk Protection
- Claims/Payment Processing
- SDoH/Health Equity Support

*ARC is used to optimize the accuracy of these capabilities and best practices.

Contact us today to let us know how we can assist you in achieving success as an ACO.
