

Empowering Performance in Value-Based Care Through an Integrated Data Ecosystem

The Analytics for Risk Contracting (ARC) platform is purpose-built to improve clinical outcomes, manage total cost of care and align revenue across all lines of business. ARC empowers (health plan, IPA, medical group) leaders to make strategic, data-driven decisions through a single, scalable solution that integrates data, analytics and workflows.

Performance

- Surface prescriptive clinical and financial insights
- Identify actionable cost, utilization, quality and risk opportunities
- Unlock full potential of value-based contracts

Patient Care

- Facilitate comprehensive care management
- Consolidate disparate member data
- Streamline clinical data collection

Providers

- Drive quality across the provider network
- Identify targeted interventions to reduce medical cost
- Engage providers as partners

Populations

- Capture accurate disease burden and revenue
- Integrate risk adjustment, quality and cost data
- Close gaps at point of care

Client Results

The COPE Health Solutions analytics platform, ARC, has allowed us to effectively manage our VBP contracts and helps us achieve significant savings below the MLR targets.
